Preface . . .	xvii
About the Authors . . .	xxi

chapter 1

History / 1

National History	1
Early American Colonial Period (1600–1800)	1
American Schools in the Early 19th Century	1
Establishment of the Public Schools	2
Influence of the Transcendentalists	3
Late 19th Century: Progressivism	3
The 20th Century	4
“Finger” Plan	5
Schools in California	5
Earthquake Safety	5
Post World War II: Larger School Sites and Expanding State Control	5
Cluster Plan and Open Space Plan	6
Educational Program Goals as Key Determinant	6
1970s and 1980s	7
Functional Approach	8
The 21st Century	8

chapter 2

Funding / 11

Overview	11
History of School Facility Funding in California	11
1952—School Building Aid Law Enacted	12
1966—New State Loan Program	12
1972—New State Sources of Funding	12
1976—A Watershed Year for State Role in Funding School Facilities: The Lease-Purchase Program Is Established	13
1978—Prop. 13 Revolution	13
1982—Mello-Roos Is Born	14
1996—Impact of Class Size Reduction on School Facilities	15
1998—Another Watershed Year in State Funding: The LPP Becomes the SFP	15
Post-2002	16
The Finance Team	16
Bond Counsel	17
Financial Advisor/Underwriter	17
Disclosure Counsel	18
Sources of Money to Build Schools in California	18
State Bonds Under the SFP	18
AB 16/Propositions 47 and 55: 2002 and 2004 state bond	18
Distributing state bond money to school districts	24

Contents

Sources of Money to

Build Schools in California *continued*

Special State	
Funding Programs	35
Charter school facilities	35
Multi-track year-round	
educational operation grants	36
Class size reduction.	38
State Relocatable	
Classroom Program	41
State Deferred	
Maintenance Program	41
Small high schools	43
Local Bonds	45
School district debt financing.	45
General obligation bonds	46
Mello-Roos Community	
Facilities Districts	51
Legal issues related	
to special taxes	52
Lease Financing	53
Direct lease	54
Certificates of participation	54
Lease revenue bonds	55
Tax and Revenue	
Anticipation Notes	56
Special Assessments	56
Assessment district	
formation procedure	57
Land Banks	58
Developer Fees:	
SB 50 and AB 16	59
SB 50 developer fees	59
Other sources of	
school facility funds.	67

chapter 3

Planning and Design / 73

Planning Team	73
Team Activities	74
Educational Facility Planners.	74
Design Professional in Charge	
(Architect/Engineer of Record).	74
School Board Members	75
District Superintendent	75
School Principal	75
Project Manager	75
Construction Manager	76
Engineers and	
Specialty Consultants	76
Facilities Master Plan.	77
Importance of the	
Facilities Master Plan	77
Coordination with Local	
Government and Community	77
Contents of the Facilities Master Plan	78
District history and background.	78
Community factors	79
Educational program	79
Existing school facilities	80
Priorities	84
Finance and implementation plan	84
Educational	
Specifications	85
What Are “Ed Specs”?.	85
Why Develop Ed Specs?.	85
Developing Ed Specs	86
Methods for Developing Ed Specs	86

Contents

Educational Specifications <i>continued</i>	
Form of Ed Specs	87
Contents of Ed Specs	87
Coordination with State Government Regulatory and Planning Agencies	88
Safety and Welfare for School District Workers	89
Protection of the Environment from School Facility Use	89
State Role in Ensuring That State Funds Are Expended Wisely (OPSC/SAB)	89
Coordination with Local Government Agencies	90
Local Zoning Agency	91
Notice Requirement	91
Local Health Agency	92
Local Fire Authority	92
Street and Other Off-Site Improvements: Funding Considerations	94
Planning and Designing the School Facility	95
Design Process Overview	96
Educational specifications	96
Predesign planning	96
Schematic design	96
Design development	96
Construction documents	96
Design Committee	97
Selecting the architect	99
Planning and Design of the School Facility <i>continued</i>	
Modernization and Additions	102
Record drawings	102
Access compliance	102
Hazardous materials	103
Safety	103
Phasing and temporary facilities	103
Project delivery methods	103
Cost Control: A Critical Concern	103
Cost estimate or budget?	103
Cost estimate	104
Budget	104
Cost-Saving Considerations	105
Use of consulting services	105
Anticipating needs	105
Cost of the site	105
Savings in design	105
Value engineering	107
Reuse of plans	107
chapter 4	
Siting / 109	
Site Selection Team	110
Environmental Consultant	110
Regulatory Compliance—CDE Criteria	110
Site Selection Factors	110
Site Utilization Study: Early Design Considerations	111
Preliminary Title Report	112
Site Search	112

Contents

Regulatory Compliance—

CDE Criteria *continued*

Preliminary Review of CDE and District Siting Criteria	112
Consultation with Local Government	113
Procedures for Obtaining Preliminary Site Approval from CDE	114
Site size	115
Safety	115
Sites containing pressurized gas, gasoline, or sewer pipelines	116
Airport runway proximity	116
Railroad tack proximity	117
Proximity to high-voltage transmission lines	117
Proximity of site to former landfills, hazardous release, or waste sites	117
Proximity to hazardous air emissions	118
Resources with which the school district must comply	119
Presence of toxic and hazardous substances	120
Downwind of a compost facility, rendering plant, or other noxious facility	121
High-pressure water pipelines, reservoirs, water storage tanks proximity	121
Proximity to propane tanks	121
Proximity to major roadways or noise sources	121
Geological or flood hazards	122
What is the Alquist-Priolo Act?	123
How does the law work? What are Alquist-Priolo special studies zones?	123

Other Land Use Laws That

May Govern School Siting	125
Coastal Act	125
Agricultural Land Issues	126
Endangered Species Acts	126
Wetlands	126

Department of Toxic Substances

Control Review Compliance	127
Exemptions from DTSC Review	127
No state funding?	127
Categorically exempt under CEQA?	128
CDE policy regarding land acquisition	128
DTSC Review Process	128
Phase 1 Environmental Assessment	129
Contents of a Phase I EA	129
Qualifications of an environmental assessor	130
DTSC guidance	130
Coordinating DTSC review with the CDE review	130
Timing/Schedule	130
Phase 1 results	130
When Lead or Asbestos Are Present	132
Asbestos in schools	132
AHERA	132
Asbestos NESHAP	132
Lead-based paint in schools	133
Submitting the Phase 1 EA	133
Environmental oversight agreement	134
Preliminary environmental assessment	134
Project scoping and the scoping meeting	134
PEA fieldwork notification	135

Contents

Department of Toxic Substances

Control Review Compliance *continued*

PEA Workplan	136
OSHA requirements—Protecting the health and safety of workers	136
PEA workplan approval	136
Field Investigation	137
PEA report	137
Submitting the PEA Report	139
PEA availability for public comment	139
PEA notice of availability	141
Document repositories	142
PEA Hearing	143
PEA Results	143
Site Remediation Process	144
Supplemental site investigation	145
Removal action workplan.	146
Coordination with DSA	148
Remedial action plan	149

CEQA Compliance Basics

for School Facility Projects 150

What Is the School District's Role in CEQA?	151
School district is the lead agency	151
What Is the CEQA Review Process?	152
Defining the project	152
Notice to planning commission	153
Phase I: Preliminary Review	153
When does CEQA apply to a school siting and construction process?	153
When is an activity a project?	153
When might a school district's school facility project be exempt from CEQA?	154
Phase 2: Initial Study	158

CEQA Compliance Basics

for School Facility Projects *continued*

Phase 3: Preparing the Environmental Document.	159
Types of EIRs	159
Project EIR	159
Program EIR	159
Tiering from plan-level documents	160
Tiering from local government general or specific plan EIRs.	161
Time pressure	161
The law	161
CEQA Guideline section 15004	162
Earlier timing of CEQA review: Pre-site selection	163
New project definition emphasizing education mission	164
Phase 4: Project Approval	165
Findings	165
Statement of Overriding Considerations	166
Certification of the EIR	166
Project Approval	167
Notice of Determination	167
Fish and Game Fee	167
Thirty-Day Statute of Limitations	167
Land Acquisition	167
Acquisition by Gift	168
Acquisition by Purchase from a Willing Seller	168
OPSC review and approval of purchase	169
Multiple sites	170

Contents

CEQA Compliance Basics for School Facility Projects <i>continued</i>	
Acquisition by Eminent Domain (or Condemnation)	171
Eminent domain:	
Main steps in the process	171
CEQA compliance	172
Statutory offer	172
Notice and hearing for the resolution of necessity	172
Filing the complaint and depositing the money	173
Order of prejudgment possession	173
Trial and compensation	174
Relocation as a Site Acquisition Issue	174
Final Approval from CDE	176
Special Issues: Joint Use, Small Sites, and Playgrounds	176
Joint Use Projects	176
Choosing appropriate sites for joint use facilities	177
Key factors to consider in a joint use agreement	178
AB 16: State policy and funding for joint use projects	179
Joint use: Easier said than done	179
Small School Sites	180
Site size adjustments	181
Playgrounds	182

chapter 5

Constructing / 185

Construction Team	186
Program Manager	186
Project Manager	186
Project Architect	186
Construction Manager	187
Construction Contractors	187
Design/Builder	188
Inspector of Record	188
Selection of the IOR	188
Selection of Construction Legal Counsel	190
What Is the Owner's Role?	190
Project Delivery Methods	191
Delivery Method No. 1—Design/Bid/Build	191
Potential downside of design/bid/build	191
Delivery Method No. 2—Construction Management	193
Advantages and disadvantages of CM/multi-prime system	193
Delivery Method No. 3—Design/Build	195
Alternative no. 1: Competitive bid design/build	195
Alternative no. 2: Best value method	196
Potential disadvantages of design/build project delivery	197

Contents

Project Delivery Methods *continued*

Delivery Method No. 4—	
Lease-Lease Back	197
Methodology	197
Eligibility for state funding	198
Lease-lease back advantages and disadvantages	198
Conclusion	200
Which Delivery Method Is Best for This Project?	200

DSA Regulatory

Review and Approvals	200
DSA-Exempt Projects	201
Initial Project Submittal	202
Plan Review	202
Addressing DSA's plan review comments	202
Back-check and approval	203
Deferred Approvals	203
Subsequent Changes to DSA Stamped, Approved Drawings	204
Expedited DSA Review Process for Relocatable Building	205
Energy Efficiency Grant Approvals	205
Historical Building Program	205

Construction Bidding	205
Competitive Bidding for Design/Bid/Build	205
Pre-Qualification of Bidders	206
Advertising	206

Construction Bidding *continued*

Bid Period	206
Bid Documents	207
Addenda	207
Subcontract Listing	208
Pre-Bid Conference	208
Bid Opening	209
Alternate Bids	209
Bid Responsiveness and Responsibility	209
Responsiveness of the bid	210
Bidder responsibility	210
Waiver of Bid Defect	210
Bid Withdrawals	210
Award to the Successful Bidder	211
Bid Protests	211
MBE/WBE/SBE/DVBE Goals	212
Bonding Requirements	212
Bid Bonds	212
Payment Bonds	213
Performance Bonds	213
Release Bonds	213
Confirmation of Bonding	214
Other Construction Issues	214
Modular/Portable Classroom Piggy-Backing Contracts	214
Non-Certified Relocatable Classrooms	214
Liability risks to school district	215
How to obtain SB 1469 certification	215

Contents

Construction Procedures and Activities	216
Pre-Construction Documents	216
Pre-construction Conference	216
Notice to Proceed	217
Contract Documents	217
Project Schedule	217
Schedule of Values	218
Construction Meetings	218
Inspection and Testing	218
Pay Requests	219
Changes	219
Change order causes and responsibility	220
Design (scope) change	220
Unforeseen conditions	220
Some additional change order requirements	220
Change order waiver and release language	221
Design team errors and omissions	221
Prompt Payment Act	222
Progress payment requests	222
Payment of retention	222
Construction Claims	223
Claims mitigation	223
Punch lists	224
Stop notices	224
Release bond	225
Final payment, unconditional waivers, and releases	225
DSA closeout and certification	225
Notice of completion	226
Appeal of DSA decisions	226

State Regulatory Requirements During Construction	227
The Field Act	227
Joint use projects and the Field Act	228
Prevailing Wage and Labor Compliance Program	228
What is the prevailing wage?	228
Basic rule	228
What school districts must do to comply	229
Labor compliance programs	230
California Occupational Safety and Health Act	231
Storm water runoff control	234

Short Articles

chapter 1

High Schools (or Secondary Schools)	3
<i>Hall v. City of Taft</i>	6

chapter 2

Regarding Laws and Regulations	12
What Is a Priority Point?	24
The Allocation Controversy	25
Unfunded List	26
Cohort Survival	27
The Short Life of the "Use of Grants" Regulation	32
Case Study I	51
Case Study II	52
Brief History of Developer Fees	60

Contents

Short Articles *continued*

chapter 3

Demographics in Depth	81
State Role in Ensuring That Schools Are Safe	90
State vs. Local Role in Public Education	91
Qualifications-Based Selection	100
The Pitfalls of Shopping Price	101
DVBE/MBE/WBE	102
The Real Cost of Building a School	105

chapter 4

Geological and Environmental Hazards Report	125
Assembly Bill 972	128
Assembly Bill 2644	128
Assembly Bill 387 Senate Bill 162.	129
Assembly Bill 14	129
Collecting Samples.	130
Factors for Success— General Considerations for a Successful DTSC Review	131
Benefits of Phase 1 Completion	133
Phase 1 EA	134
Performing a Risk Assessment.	138
Whether to Prepare CEQA Guidelines for the District	152
School District Reorganization Issue and Lawsuit.	153
Controversy Over the Application of the Class 14 Exemption	157

Short Articles *continued*

chapter 4

Public Scoping Law.	164
Use of Option Agreements and Timing of CEQA Compliance	169
Land Banking and Timing of CEQA Compliance	170
Submittal Documents Required to Obtain Final CDE Approval.	175

chapter 5

Spearin Doctrine	192
Successful Construction Management Examples	193
General vs. Multiple Prime Contractors	193
Construction Manager as Agent vs. Construction Manager at Risk	194
Developer-Built School	195
The Biggest Misconception of Design/Build	196
Forms to Include in a Bid Package	207
Conducting a Successful Public Bid Opening	208
Right to Reject All Bids.	211
Critical Path Method	216
Importance of a Baseline Schedule	217
Change Order Pitfalls for the Project Owner	220
Underground Unforeseen Conditions	220
Win the Document Battle	223
DSA Closeout Checklist	226

Contents

Figures

3-1 Typical Bubble Diagram	88
4-1 DTSC Review Process	129
4-2 PEA Process	134
4-3 Option A Flow Chart	140
4-4 Option B Flow Chart	142
4-5 RAW Process	147

Tables

2-1 Recent State School Bond History	16
2-2 Comparison of School Facilities Bonds SB 50 (1998) and AB 16 (2002)	19
2-3 General Obligation Bonds	50
2-4 Fee Justification Study vs. SFNA Legal Requirements	64
3-1 Educational Facility Area Standards Summary of Minimum Size Areas	98
4-1 Categorical Exemptions	155
4-2 Examples of Successful Joint Use Projects in California	177
